***CustomLab Now Works with GE LOGIQ Ultrasound Systems
Study Measurements Transfer with Push Button Ease!***

Twin Cities, Minnesota - BioMedix is pleased to announce that its proven Vascular Lab Management Software, CustomLab, now supports data transfer from the entire line of GE LOGIQ series imagers, including the LOGIQ 7, LOGIQ 700, LOGIQ 9; as well as the LOGIQ Book, GE's newest in its line of advanced ultrasound imaging technology. Completion of this integration effort makes the CustomLab software program the only package in its class that is directly compatible with ultrasound imaging equipment. GE Medical Systems, a \$9 billion global leader in Ultrasound systems co-markets CustomLab with BioMedix.

"This is incredible news," said Rick Grave, Senior Product Manager & Software Specialist. "This integration gives both BioMedix and GE Ultrasound customers a great way to save time and money in lab operations", Grave stated. "We are pleased to deliver on our customers most stringent technology needs and requirements while saving them time and money by automating numerous data entry tasks", said Todd Aldrich, VP of Marketing at BioMedix. "The ability to transfer data from both physiologic and imaging equipment product lines at the push of a button is a clear advantage in the competitive Lab Management Software market." CustomLab provides reporting, accreditation and laboratory management for non-invasive vascular examinations. The GE LOGIQ Book, at just 10 pounds, delivers the same functionality, raw data processing and archival options found on every other LOGIQ scanner.

About BioMedix

Founded in 1997, BioMedix is the fastest growing developer, manufacturer and distributor of state-of-the-art medical systems and services that enable early detection of vascular disease through simple, non-invasive tests. BioMedix systems offer plug-and-play integration with existing networks and help physicians assess, diagnose and treat peripheral vascular disease by enabling efficient workflow within and between different primary care doctors and specialists. Visit BioMedix on the web at www.biomedix.com.

About GE Medical Systems

GE Medical Systems is a \$9 billion global leader in medical imaging, interventional procedures, healthcare services, and information technology. Its offerings include networking and productivity tools, clinical information systems, patient monitoring systems, surgery and vascular imaging, conventional and digital X-ray, computed tomography, electron beam tomography, magnetic resonance, ultrasound and bone mineral densitometry, positron emission tomography, nuclear medicine, and a comprehensive portfolio of clinical and business services. For more than 100 years, health care providers worldwide have relied on GE Medical Systems for high quality medical technology and productivity solutions.
