BioMedix® Completes ISO 9001:2000 Upgrade

Twin Cities, Minnesota - BioMedix, Inc. announced the Company has completed its transition to the new ISO 9001:2000 Quality Standard and has been recommended for certification to the new ISO Quality criteria.

"As one of the early adopters of ISO 9001:2000, BioMedix continues to demonstrate the Company's commitment to delivering quality products and services," states Will Rogers, BioMedix Customer Service Vice President and Chief Clinical Specialist. The certification audit, conducted by BSI, Management Systems, was completed on July 9th, 2003.

BACKGROUND:

BioMedix develops, manufactures and distributes integrated healthcare network solutions and medical systems that enable early detection of Vascular Disease through simple, non-invasive community-based testing. BioMedix also offers leading vascular laboratory management and accreditation software packages with advanced user-defined automated interpretation, coding, billing and outcome analysis.
