BioMedix™

BioMedix™ for Podiatric Physicians

A Collaborative Approach

BioMedix™ supports the Podiatric community with dedication to prolonging and enhancing life through the early detection of vascular disease and helping to build Podiatric centers of excellence for patient care. The BioMedix™ suite of integrated hardware, Health Information Technology (HIT) software, fully certified Electronic Health Records (EHR), advanced practice management and web-based solutions provide a platform that supports a continuum of collaborative care.

PADnet™+ Arterial Testing

Over 10 million Americans have P.A.D. Without proper treatment, 30% are likely to die within five years of P.A.D.-related heart attack or stroke.¹ Those numbers can be significantly decreased by connecting Podiatric Physicians with vascular specialists to optimize collaborative patient care with the use of PADnet™+.

PADnet™+ is an easy to use system that uses automated means to obtain Ankle-Brachial Index (ABI) values, Toe-Brachial Index (TBI) values and Pulse Volume Recording (PVR) waveforms. In just 15 – 20 minutes during a regular office visit, the non-invasive ABI, TBI and PVR tests help identify obstructive disease and determine whether medical or surgical treatment is necessary.

Two mouse clicks sends the patient's demographic, history, risk factors and test data quickly and securely, ensuring both speed and error-free transmission while maintaining HIPAA compliance.

PADnet™+ saves time and travel to a hospital or specialty lab by sending test results instantly via the web for interpretation by a vascular specialist of your choice. Specialists can review results at their convenience, from any secure internet connection in the world.

Claims submission for PADnet™+ tests meet the requirements for CPT® codes 93922, 93923 and 93924 (optional post-exercise testing), given approved physical signs and symptoms², providing a fair financial return.

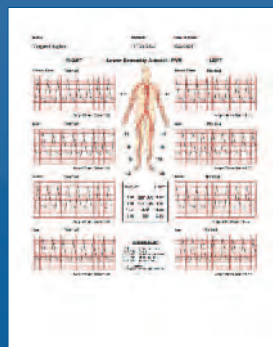

PADnet™+ seamlessly integrates with TRAKnet™ PM - DPM Edition EHR and Practice Management system for a complete solution for your center of excellence.

Arterial Report and Test Summary

Venous Report and Test Summary

PADnet™+ Venous Testing

By the age of 50, nearly 40% of women and 20% of men have significant leg vein problems. An estimated 20 to 25 million Americans have varicose veins.³ This presents a significant opportunity for Podiatric Physicians.

The PADnet™+ venous test is a non-invasive test that can be completed in just 5–10 minutes during a regular office visit. Venous refill testing helps to identify problems affecting venous circulation and determine whether medical or surgical treatment is necessary. This exam falls under CPT® code 93965², given approved physical signs and symptoms.

This program also includes a complete Marketing Launch Kit to help you promote your services.

TRAKnet™ PM

Advanced Practice Management Solutions

DPM EDITION

BioMedix™ takes Podiatric practice technologies to the next level with TRAKnet™ PM - DPM Edition, an integrated Electronic Health Record (EHR) and Practice Management solution. This customizable, easy to use system is built on the trusted Microsoft® SQL Server platform. Designed by and for Podiatric Physicians exclusively to meet the needs of today's Podiatric practice, it is the first practice management system to be honored with the APMA Seal of Acceptance.

TRAKnet™ is Accepted

TRAKnet™ PM - DPM Edition offers a fully certified EHR along with charting, scheduling, e-prescribing, billing and inventory management, enabling seamless operation and increased efficiency and effectiveness while reducing costs. Transitioning from scheduling to encounters and claims is effortless with TRAKnet™ PM - DPM Edition.

TRAKnet™ PM - DPM Edition compliments and fully integrates with a wide range of ancillary tools, the BioMedix™ PADnet™+ vascular diagnostic system and the full BioMedix™ suite of software and products.

Podiatric practices no longer need to work with multiple companies and different platforms to fulfill their practice management needs. Today, they can partner with a single trusted company, BioMedix™, utilizing one all-encompassing platform for seamless, efficient and effective practice operations and patient care.

“I know what I want to accomplish in my practice and I know how to get there. The ultimate goal is to be the best. Using the best technology available, an integrated EHR (TRAKnet™ PM - DPM Edition) and state of the art diagnostic equipment (PADnet™+) will help me build a ‘Center of Excellence’ for my patients.”

IRA KRAUS, DPM

Speaking on PADnet™+ and TRAKnet™ PM - DPM Edition in his practice

BioMedix™

Integrated Podiatric Solutions for Better Care and Better Business Performance.

PADnet™+

PADnet™+ is an easy to use diagnostic system for non-invasive P.A.D. and CVI testing in community care settings. Podiatric Physicians collaborate with vascular specialists to optimize patient care with the use of PADnet™+. When integrated with TRAKnet™ PM - DPM Edition, PADnet™+ provides a complete vascular solution for Podiatric Physicians.

TRAKnet™ PM - DPM Edition

TRAKnet™ PM - DPM Edition Advanced Practice Management Solutions offers EHR, charting, scheduling, e-prescribing, billing and inventory management modules. TRAKnet™ PM - DPM Edition interfaces with and complements the BioMedix™ suite of software and products between physician offices, podiatry practices, vascular labs and hospitals.

About BioMedix™

BioMedix™ is a leader in Health Information Technology (HIT) software, products and services that connect Podiatric Physicians, Primary Care Physicians, vascular labs, vascular specialists and healthcare systems in a continuum of collaborative care.

We provide the only integrated suite of hardware, software and online services designed to cost-effectively detect vascular disease. Our award-winning suite of medical devices, advanced practice management and Electronic Health Record (EHR) software and web-based solutions give providers a more complete view of patient care.

BioMedix™ products are designed to share information and work together in a continuum of care:

PADnet™+ vascular diagnostic system integrates with TRAKnet™ PM - DPM Edition for a complete solution for your center of excellence.

TRAKnet™ PM - DPM Edition compliments and works seamlessly with PADnet™+ and the full suite of BioMedix™ software and products.

TRAKnet™ Lab software improves lab efficiency and supports ICAVL accreditation.

TRAKnet™ Outcomes tracking software improves financial and therapeutic outcomes.

PADnet™ Disease Management System 2.0 collaborative care program for developing best practices for vascular program planning and growth.
